

ROOFTOP TRUSS SYSTEMS

BeamZ Rooftop Truss systems includes everything you need for a medium to large sized event. It is used mainly for outdoor events like concerts, fashion and entertainment shows, theatrical performances and many others. We have various ready-made Rooftop Truss kits available and we can also supply custom-made roof-top systems to your exact specification. The ready-made kits comes standard with roof sheathing that is constructed of high quality flame retardant PVC material and is available in several colours. Also equipped with guy wires, rigging motors, static calculation and a manual. Available with or without stage decks.

P30-L SERIES TRUSSES

- Square aluminium truss
- Fast and easy to assemble
- Lightweight
- Coupling system P30 excluded
- Made in Europe
- TÜV certified

BeamZ P30 Truss means strength, durability, stability, lightweight and total flexibility! The P30 truss is constructed of main tubes (51 x 2 mm) and diagonals (20 x 2 mm) and equipped with the P30 conical coupling system what makes it fast and easy to assemble. You can choose between black or aluminium colour. Available in a variety of lengths, corners and accessories you are able to create an almost infinite combination of shapes and designs for your venue. Ideal trussing system for rental, touring and exhibition companies.

Key advantages of BeamZ P30 Truss:

- Lightweight for easy transport
- European-made
- Resistant to heat, cold, moisture and corrosion
- Secure P30 conical connection system for quick setup
- High tensile strength for enhanced durability
- Low maintenance
- Also available in black colour
- Certified and inspected to meet highest safety standards

Notes:

The values are characteristic according to Eurocode. Partial safety factors (1,35/1,5) are considered.

Interaction of internal forces at connector are considered.

The table data have no limitation of deflection.

The loads are only valid for static loads. The system is perfect and secured against lateral buckling.

The self-weight of the truss system is considered.

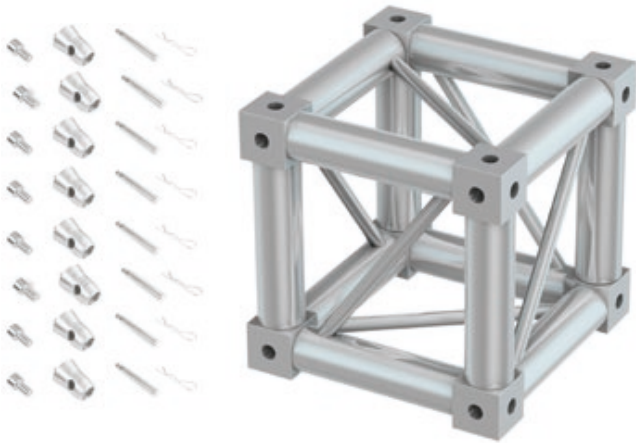

The deflection is calculated for a ideal beam. Because of the flexibility of the connector real deflection is a little bit higher.

Load application occurs directly in the nodes and both framework sides are loaded equally.

The values are only valid for the single span girders analysed here. Complex structures are not covered by this.

Complex structures, special cases or special constructions can be analysed by Runtemund Engineering acc. to German, European or International standards.

188 x 200mm

P30HCK CONNECTOR KIT

- Half conical connector kit with M10 thread
- Kit contains 1 half conical coupler, 1 conical spigot with thread, 1 selflocking nut
- Maximum load 100kg
- Suitable for mounting the H- and T- downrigger to the P30 truss systems
- Made in Europe

182.356

P30 MCB CONNECTOR SET

- Set contains 4 conical connectors, 4 conical spigots, 4 screws, 4 safety spring
- Coupling system P30
- MCB connector set
- Fast and easy to assemble
- Lightweight
- Made in Europe

182.365

P30 CONNECTOR SET

SET

- Set contains 4 conical couplers, 8 conical spigots, 8 safety spring
- Coupling system P30
- Fast and easy to assemble
- Lightweight
- Made in Europe

182.366

P30 CONICAL CONNECTOR SET

SET

- Coupling system P30
- Designed to offer a stable and strong truss connection
- The shape of the connector will offer easy assemble or disassemble
- Made in Europe
